Re: Rehabilitation of the 200 block of East Chester: Sewer Service Installation

Dear Resident:

The City Council has asked us to keep residents constantly up to date with regards to this project. The City's contractor, Araz Industries Inc. has advised the City of Long Beach that they will start the installation of the Sewer services on your street beginning Wednesday, May, 13, 2015 (weather permitting).

To accommodate the contractor, it will be necessary for All cars parked on the street to be moved off the block each day prior to 7:30 A.M.. The road will be reopened at the end of the work day. Garbage and recyclables pickup schedules will not be impacted. If you are expecting any deliveries or services at your home, you may wish to contact the appropriate party to apprise them of the road closures. We thank you in advance for your cooperation and patience.

Sincerely yours,

Department of Public Works
