

# The City of Long Beach

## CLARK STREET PARK UPDATE

We appreciate your patience regarding the renovation of Clark Street Park. The Department of Public Works has removed the unsightly mound in the center of the park and new irrigation will be installed within the next two weeks along with top soil and seed. Following this installation we will be holding a community engagement session to gather feedback on what residents would like to see most in this newly refurbished section. Once finalized, the date and location will be announced. We look forward to meeting with the community, and to the upcoming renovation of Clark Street Park.
